January 1, 2011

Mr. Ronald Santini  
VP, Transmission & Distribution  
Champlain Energy, Inc.  
Three Champlain Way  
Crossroads, NC 12345

Dear Mr. Santini,

The Board of Directors of the Nebo Homeowners Association was recently made aware of a proposed high voltage electric transmission line to be constructed adjacent to the Nebo neighborhood. As elected representatives of the Nebo Homeowners Association we are concerned about this proposed line and the negative impacts it will have on property values as well as health concerns associated with EMF and the visual impacts of having large towers within yards of homes.

We would like to meet with you and your project team to discuss our concerns and how Champlain Energy plans to address these concerns. The Board of Directors is available to meet during the week of January 15, 2011 to discuss these concerns. Please contact the Nebo HOA at 547-555-1234 if this week is available for you and your team to meet.

Sincerely yours,

John Q. Public
