

## Downloading and Installing ArcGIS for Desktop 10.2.2 Student 1-year Trial

Activate the Authorization Number we have given you here:

<http://www.esri.com/landing-pages/software/arcgis/arcgis-desktop-student-trial>

If you do not have an Esri Global Account you will be prompted to create one.

Once you activate your Authorization Number, instructions will be emailed to you. (See the second page for what the email looks like.)

After you activate your Authorization Number the web site will take you to a page where you will be prompted to enter the Authorization Number we have given you. Then you will be prompted to select a Version of the ArcGIS for Desktop software. Select **ArcGIS 10.2.2 for Desktop** unless your instructor tells you otherwise.

Continue to follow the instructions in the email sent to you. If you want to see an expanded list of steps follow the [online resources](#) link at the bottom of the Esri email – disregard references to a 60-day trial version.

- It may take up to an hour to download the software installation file. It will take several minutes to install the software. Plan accordingly.
- When you install you will need Administrator level privileges.
- To check to see if you have Microsoft .NET Framework 3.5 SP1 installed do this: **Click Start | Control Panel | Programs and Features | Turn Windows Features on or off**. If you need to install it go to [www.microsoft.com/en-us/download/](http://www.microsoft.com/en-us/download/) and search for it.
- Even though the installation process may include an uninstall of the older version that is already on your machine, it is probably best if you make a point of uninstalling the old version first, before installing the new version.
- Install the **Complete** package, when prompted.

If you have any problems please contact Beth King ([bethking@psu.edu](mailto:bethking@psu.edu)). Beth is on our faculty and is also our program point of contact with the Esri support center.

.....

Here is the email you will be sent:

Dear xxxxxx,

Please follow the steps below to download and install ArcGIS 10.2.2 for Desktop.

- Uninstall any previous versions of ArcGIS that you may already have on your machine. For best results, please download and use the ArcGIS Uninstall Utility below.
- Download ArcGIS for Desktop, Microsoft .NET Framework 3.5, and the other files you would like to install. Please note that ArcGIS Data Interoperability, ArcGIS Data Reviewer, and ArcGIS Workflow Manager require ArcGIS for Desktop.
  - When downloading with the Esri Download Manager, you can select and download multiple products. However, only one product should be launched at a time when the downloads are complete.
  - Make sure you have write access to your download directory location as well as your ArcGIS installation directory location, and that no one is accessing it.
- Install the Microsoft .Net Framework 3.5 Service Pack 1 below.
- Install and authorize ArcGIS for Desktop
  - Select a destination folder to extract the install files to. If you choose, you can automatically launch the setup after the files have been extracted
  - When prompted, select **ArcGIS for Desktop Advanced Single Use**.
  - When prompted, accept the default, **I do not wish to authorize any extensions** at this time. The extensions will be authorized automatically.
  - Enter your authorization number: **EVA**\_\_\_\_\_.

Assistance, FAQs, and support for the ArcGIS 10.2.2 for Desktop trial software are available on the [online resources](#) page.

**Please save this e-mail for future reference.**

Thank you,  
The ArcGIS Team
