CANOPY COVER

Quickly assess crop coverage in later growth stages reported as a coverage percentage. Canopy cover can be segmented by any management unit and is the base product for crop productivity measurements such as stay-green and brown-green ratio.

FIELD STATISTICS

AUTOMATED PLANT
HEIGHT MEASUREMENT

We provide 3D data to quickly assess crop height and density from any angle. Evaluate your crops for uniformity and yield potential.

| 3D ANOMALY DETECTION

AUTOMATED ANOMALY
DETECTION

Another benefit of 3D data is the ability to see anomalies in the field commonly associated with weeds or stalk lodging.
